

LOWBOY SERIES CONDENSATE RETURN / BOILER FEED TANKS & SYSTEMS

Large, Small or In-between...
Standard or Custom Models...

EXCEPTIONAL VALUE, EXTRAORDINARY QUALITY

Aero Lowboy Series tanks & systems are available in stainless steel or carbon steel, simplex or duplex, and can be configured to work as a condensate return tank or boiler feed system. Standard tank capacities from 100 to 300 gallons for a 1 gallon to 1 horsepower ratio for your boiler application. These tanks are made to fit many other brands of vertical flange mounted pumps. Be sure to see our Aero Pumps for a complete system.

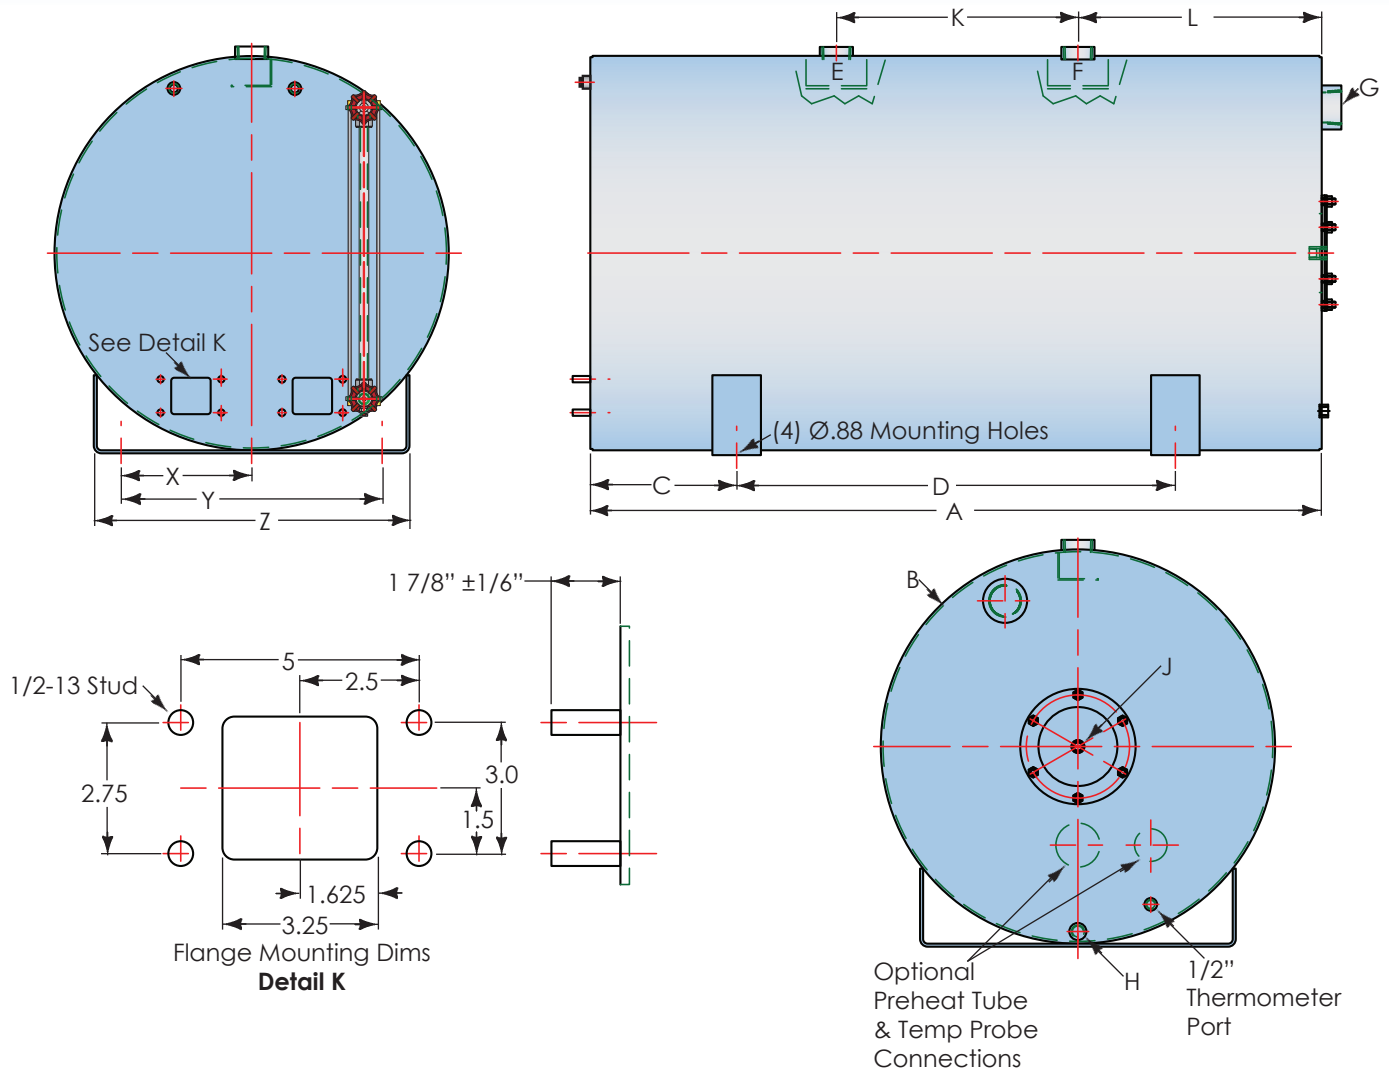

Ergonomic Design - All piping is easily accessible from the top and ends of the tank. A sight gauge mounted on the front of the tank for high visibility is standard.

Optional Control Panel - Available in simplex and duplex for single or three phase. A limitless array of options are available for your custom needs.

Construction Materials - Stainless steel tanks are constructed of a combination of 10 gauge and 12 gauge material for superior durability and strength. Carbon steel are made of 11 gauge up to 100 gallons, then 3/16" for 150 gallon or above.
